

Cage assembly

Models #529, #530 and #531

Pieces

Cage in pack

Feeder

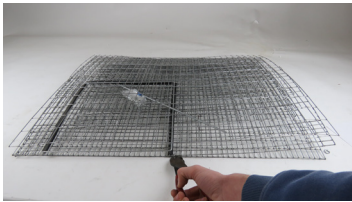

Bag of clip

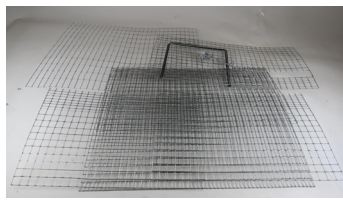

Door rod #910

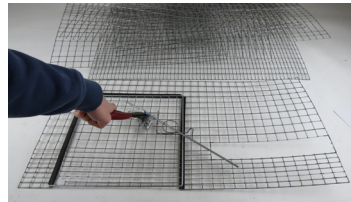

Installation

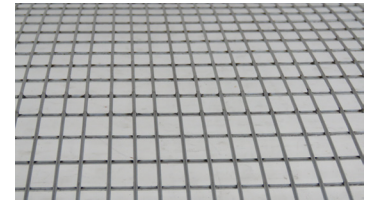

1. Remove the few clips that hold all the pieces together using pointed pliers or cutting pliers.

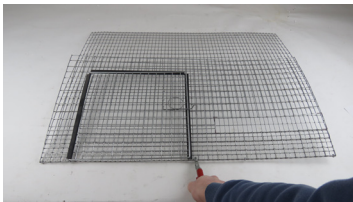

2. Separate all the pieces.

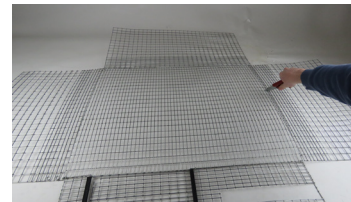

3. Remove from the front panel the clip holding the bag of clip and the door rod using pointed pliers or cutting pliers.

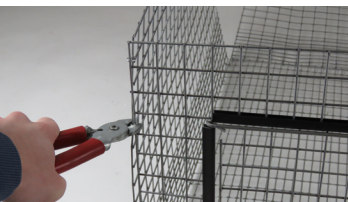

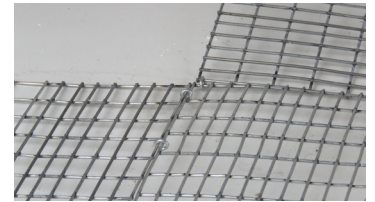

4. Position the bottom of the cage making sure that the wire at 1/2" is on top, as shown above.

5. Using the smallest clips and a round clip pliers (such as our models #HP or #601), attach the front with the bottom of the cage by installing clips every three inches (7.5 cm).

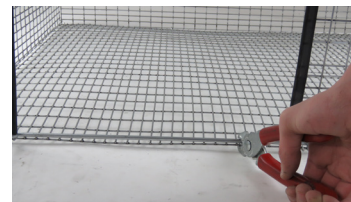

6. Repeat step 5 for the three other sides of the cage, making sure to install the horizontal lines of the baby saver towards the inside of the cage, as shown above.

7. Attach the sides together using clips and spacing them of 3 inches apart (7.5 cm).

8. Install the top by installing a small clip every three inches (7.5 cm).

9. Center the rod #910 with the cage door and clip it to the bottom using the clips of 3/4" (the biggest clips provided).

10. Install the feeder on the front of the cage.
